The publisher would like to inform that the primary title of this published article [Journal of Food Quality and Hazards Control 4 (2017) 113-118], was “5-Hydroxymethylfurfural and Total Phenolic Contents and Antioxidative Activity of Northwestern and Southwestern Iran Honey”. However, shortly before preparing of the last version of the galley proof, the journal office received an urgent scientific comment from one of the journal peer-reviewers indicating necessary required correction of the title and consequent related revision. Then, the edited galley proof was considered to be sent to the corresponding author in order to declare any opinion (if any) about the mentioned revision at maximum 72 hours. Unfortunately, it was later found that probably due to temporally problem of the journal website, the galley proof had not been sent to the corresponding author. The publisher apologizes for this unintentional misunderstanding.
